

Product Summary

TEN-90

Compact, high performance ADS-B antenna

 Cost Effective

 High Sensitivity

- ▶ Small form factor, minimum wind load
- ▶ Long range reception with high framerates
- ▶ Robust design for outdoor application

TEN-90

Operation Mode	
Frequency	1090 MHz
GAIN	6 dBi

Interfaces	
SMA F connector	1

Compatibility	
Supported Devices	ADS-B receiver equipment operation at 1090 MHz

PRODUCT DESCRIPTION

The TEN-90 1090 MHz ADS-B antenna was developed with focus on best cost / performance ratio.

When installed with a free line of sight a reception of ADS-B signals from up to 550km is possible at a high frame rate.

Additional the compact dimensions of the antenna makes installation easy and dramatically decreases wind load issues
