

Notes on GNS3000 Tracking Data Conversion

manual

Tracking Data Conversion

To convert the tracking data stored on the storage card, we recommend the Open-Source tool RouteConverter¹. The install procedure is as follows:

- Navigate via the provided link to the RouteConverter website and click on *Downloads* in the navigation bar on the right side.
- To download the program, click on *Stable releases* and follow the instructions for your preferred operating system.
- If you are using Windows, click on *Windows* and download the file *RouteConverterWindows.exe* and execute it after the download has finished.

In the selection bar (Fig.1), click on *File -> Open...* and select the file you want to convert. After a short while, the route should be visible on the map.

To convert the tracking data, select File -> Save as...

(Fig.2) and choose desired file format from the dropdown menu (Fig.3). Enter a name and press *Save* to finish the conversion process.

If you want to change the language, you can select it under *Extras -> Options.*
